

Xemplar Auto 2.0

A Holistic Mobile-based Advanced Risk Management and Engagement Solution to drive your Critical Business Decisions

Xemplar Auto 2.0 transforms how Insurance Partners engage with their customers by blending risk assessment, claims processing, and customer relationships via powerful and completely mobile telematics platform. Xemplar Auto captures and analyzes complex and contextual driving data to accurately predict and lower risks, lower claims frequency and costs, and improve your customer value proposition.

Discover the true potential of Telematics with Xemplar Auto:

- Offers reliable **pre-configured parameters** that are based on extensive research, industry standards, and independent validation. It also offers specific customizable parameters allowing carriers to address their individual goals.
- Enables swift implementation in both **stand-alone** mode and **integrated** mode.
- Collects, mines and analyzes **granular data** on driving behaviors for every trip taken by the policyholders to identify their driving patterns and assess their risks.
- Utilizes **real-time** driving data insights to make critical business decisions and stay ahead of the competition.
- Strengthens your **digital strategy** by consolidating policy services, mobile claims, sales/marketing, roadside assistance, etc. into a single customer facing solution.

| What's New in 2.0?

For Insurers -

- **Saves time with the new one-step Onboarding process**

With the one-step onboarding process is quick and easy, you can choose between bulk registrations or enable self-registration by your policyholders.

- **Prevents accidents that may result from distracted driving**

Reduces distraction in driving mode by silencing audible alerts. Identifies dangerous actions such as phone and app usage while driving, providing policyholders with the information needed to reduce these actions.

- **Intuitively detects drivers**

Identifies driving activity versus passenger travel. As a global solution, Xemplar also identifies the correct drive position based on the region of use (e.g., right/left hand drive).

For Policyholders -

- **View your overall driving score to understand your driving habits**

Xemplar's Trend indicator assesses your driving behavior and provides insights to improve driving decisions.

- **Analyze individual trip details, and take corrective action to adhere to safety rules**

By analyzing individual trip details such as route, driving score, driving patterns and distracted driving, you can take corrective measures to improve your driving score by following safety suggestions.

- **Gamification allows healthy competition between drivers to benefit from carrier promotions**

Enter into a carrier sponsored game or challenge other drivers to improve your driving score.
